

LIXI PENETRATOR

The Lixi Penetrator offers a new level of flexibility and convenience in portable x-ray. Wherever the job demands it, the Penetrator provides on-site x-ray inspection. From packages to vehicles, from on-premise to off-site, from electronics to ductwork - the Penetrator is the versatile x-ray tool.

Ease of use, safety, reliability, and flexibility have all been engineered into the Penetrator. Its straightforward design and extra-long cable allow for optimal operator handling. The variable power of the unit allows for x-ray examination of a wide variety of suspect materials. The user benefits from Lixi's quarter century of x-ray engineering excellence. Reliability and safety are unmatched in portable x-ray inspection. The Penetrator's flexibility is further enhanced by the use of any standard NTSC video device. Readily available recorders and printers provide for permanent copies of the images generated during scanning.

The Penetrator has been designed by Lixi to supplement your other inspection techniques. Whether stationary x-ray or visual, your inspection results are improved through the use of portable x-ray. When the location can't be brought to the machine, bring the Penetrator to the location. When security demands are on the go, take the Penetrator with you. The Penetrator will become a valuable tool in your security arsenal.

Lixi's Penetrator - the best in portable security x-ray.
